

# ILLINOIS ASPHALT PAVEMENT ASSOCIATION SCHOLARSHIP AWARD

(revised February 14, 2011)

## **Purpose**

To assist students in gaining a better understanding of the asphalt paving industry through a Scholarship award provided by the Illinois Asphalt Pavement Association (IAPA).

## **Eligibility**

The Scholarship may be awarded to a Junior student in Civil Engineering at SIUE for the student's Senior year. Financial need will not be considered in the choice of the awardee. The student must be either a U.S. citizen or have applied for citizenship.

## **Selection Criteria**

Selection of the recipient will be based upon

- The interest of the student in the asphalt paving industry and his/her performance at the University.
- A minimum cumulative grade point average of 2.80/4.00 is required.

## **Application and Selection Process**

Awareness of the Scholarship will be made to Sophomore and Junior students in order to generate greater interest in the asphalt industry. The student interested in competing for the Scholarship must complete the IAPA Scholarship application form and turn it in to the SIUE Civil Engineering IAPA representative (currently Brent Vaughn). Unless noted otherwise, the **deadline** for returning applications is generally **January 31** in the year for which the Scholarship is awarded.

Preliminary screening of applicants will be made by the Department of Civil Engineering staff and recommendations will be made to IAPA. Final selection of the Scholarship recipient will be made by representatives of IAPA in consultation with Civil Engineering staff.

The awardee selection process will typically be concluded each year by March 1. Presentation of the certificate of the award to the recipient will be made by a representative of IAPA at the IAPA Annual Meeting in March. The Scholarship award is paid through SIUE to the student in two installments. In 2010 the award was **\$1,800**.

## **Awardee Obligations**

The awardee, in the senior year as part of his / her curriculum, will undertake a special investigation of a current problem in the asphalt paving industry. Selection of the problem to be investigated will be based upon recommendations by IAPA, the interest and available time of the awardee and the capabilities of SIUE. Supervision of the investigation will be provided by a member of the Department of Civil Engineering. The student will prepare a written report as a conclusion to this investigation which will be displayed at the IAPA Annual Meeting in the year following the Scholarship award.
